Backend engineer, 8 years, mostly distributed systems and payments infrastructure.

EXPERIENCE

Senior Backend Engineer — Payflow Sp. z o.o.

2021 – present

- Rebuilt the settlement pipeline in Go, cutting end-of-day reconciliation from 40 minutes to under 4.
- Introduced idempotency keys across the payments API after a duplicate-charge incident; duplicates went to zero.
- Own the on-call rotation runbook for six services. Reduced page volume by 60% by fixing three noisy alerts.
- Migrated 14 services from a shared Postgres instance to per-service databases with zero downtime.

Backend Engineer — Ministry of Apps

2017 – 2021

- Built REST and gRPC services in Python and Go. Wrote the integration test harness the team still uses.
- Set up CI in GitLab, taking the build from 22 minutes to 7.

TECH

Go, Python, PostgreSQL, Redis, Kafka, Docker, Kubernetes, Terraform, AWS.

EDUCATION

MSc Computer Science, AGH University of Science and Technology, 2017
